

Tumbling Blocks Challenging Method

All seams that intersect in a y formation should stop at the point of the intersection instead of sewing to the edge of the shapes. The seam should not go beyond this point and should be back-stitched to keep the seam from unraveling. Take care to avoid sewing seam allowances from other seams in the seam you are sewing. To help you sew accurately, each laser-cut shape has a small laser-cut dot at the intersection points that may have a y-intersection.

Sewing y-seams:

Sink needle in start dot,
2 stitches forward,
2 stitches backward,
Sew forward to the finish dot,
3-4 stitches backward,
cut thread.

Sewing Instructions

Set 1

Hold seam allowance 1 towards the dark piece and sew seam.

Finger press seam allowance 1 and 2 upward towards the medium. Bring the dark and the light pieces together, folding the medium in the center as shown above. Holding the seams in place, sink the needle in the start point and sew the seam.

Tumbling Blocks Challenging Method

Set 2

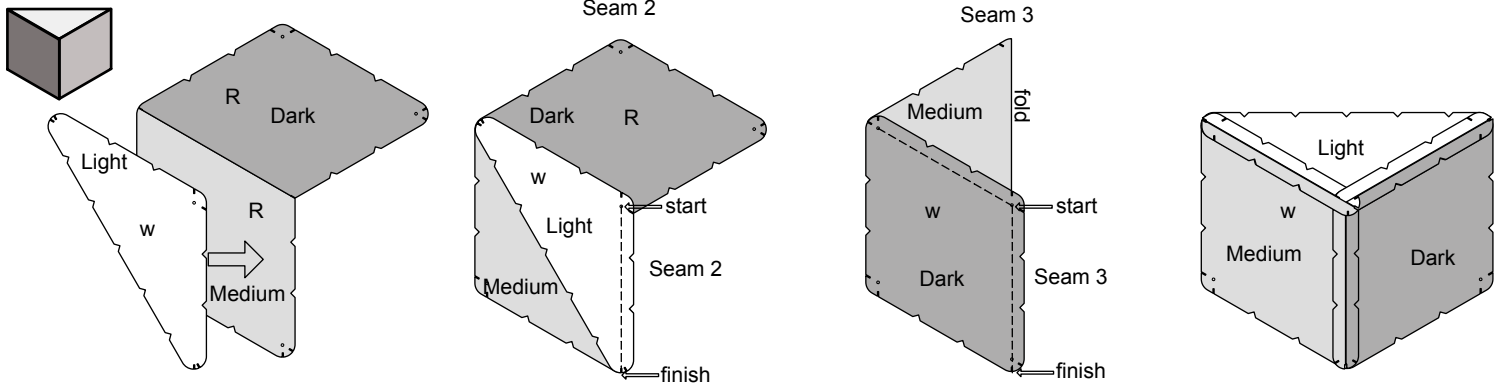

Position the triangle so the laser-cut dot is in the upper point of the rhombus. See the red box.

All inside seams on the quilt top must be sewn from y-seam dot to y-seam dot. Seams that end at the edge of the top, can be sewn to the edge.

Set 3

Top Edge Unit

Complete seam 1 the same way as directed for set 1.

Hold seam allowance 1 towards the dark piece and sink the needle in the laser-cut dot start point. Finish seam to the edge since this is not a y intersection.

Finger press seam allowance 1 and 2 upwards towards the medium. Bring the dark and the light pieces together, folding the medium in the center as shown above. Holding the seams in place, sink the needle in the start point and finish to the edge.

Press seams open.

Set 4

Right Corner Unit

This seam is sewn from edge to edge.

Left Corner Unit

Press seams open.

Tumbling Blocks

Challenging Method

From the 85 whole cubes, you will have 4 copies of every color group and 1 extra copy of 5 colors. Place the 5 extra aside. Make 4 piles, placing 1 of each color in each of the 4 piles so you have 20 cubes in each pile. The best way to randomize the cubes is to divide the quilt into 4 quadrants, dedicating one pile of cubes to each quadrant and working the extra 5 cubes in between the quadrants or at the bottom.

On a large table, arrange the first row with the 8 top edge units and 2 corner units. Arrange the first pile of cubes in the upper left quadrant, placing the colors that appear in row 1 toward the bottom of the quadrant. The goal is to have cubes of the same or similar color distributed randomly around the quilt. Arrange the top right quadrant, keeping the identical cubes sufficiently apart and random. If your table is not large enough to fit all the shapes, work with one half at a time, sewing the units into rows to make it easier to work with. Next, lay out the bottom quadrants. Finally, add the side units and bottom edge triangles to the bottom.

Sew units into rows: Use the same y-intersection seam technique for all inner seams. Seams that end on the outside edge can be sewn to the edge. Sew the bottom triangles from set 5 to the bottom row of cubes similar to the way set 3 units were assembled.

Sew rows together. Starting from either side of the row, pin and sew one seam at a time, from dot to dot. Avoid sewing any seam allowances into the seams by finger pressing them away from the dot.
